How you will access home learning		All presentations and worksheets will be made available through MS TEAMS using the team created for that IT group. Please look under the section entitled files. We are planning on creating class notebooks to support students within MS TEAMS so these will be phased in and students will be informed when to swap to this area in MS TEAMS.									
How you be able to interact with your teacher and gain feedback on your work		MS TEAMS will provide a medium for the distribution of materials and may have further questions in the chat on the general									
Ho	etrieval Focus w we will help you to call previously learnt knowledge	The unit will be a new one but may consolidate knowledge, skills and understanding from KS2. Quizzes will be used in the schools Moodle platform and links will be shared through MS Teams. The use of an IT Journal to support and encourage students will be made available in MS Teams.									
Learning	What you will be learning about this week	The unit is subdivided into six learning hours spread across six or seven lessons in order to fit with the school timetable. It is a practical unit covering the basic theory, creation and use of a single-table database and a simple relational database involving two tables in a one-to-many relationship. Students will start by looking at an existing single-table database, learning how to add records and make queries. In subsequent lessons they will create									
New I	a flat-file or two-table relational database of their own, using suitable field types and accompanies to the second state of their own, using suitable field types and accompanies to the second state of their own.					ing in appropriate	validatio	ns			
Z		 an input form with help text, combo boxes and list boxes queries and a report using data from one or both tables 									
				olication linking to the		rm and report					
	How we will teach you the new knowledge or ideas	MS Access is used in this unit. Students will be taught through; • MS TEAMS. • Worksheets • Practical tasks using MS Access software • Low stakes knowledge quizzes									
	Activities that will help you learn and practice what you've been taught	Pupils will put evidence of the database they created into an Assessment Portfolio. They will also answer questions on the subsections of database creation in order to demonstrate understanding. Regular teacher assessment, including questioning and observation, will be used in each lesson in order to reinforce the evidence of understanding in the Assessment Portfolio.									

	What you can do if you're stuck	Firstly if a student is stuck on something in one of the lessons on control systems they should review the content as the directions to answers are always provided. If students are still struggling then students can contact the teacher through email, or MS TEAMS.
How you	Checking in www will check in with u to support you with our remote learning	MS TEAMS allows teachers to see progress on the worksheets and screen grabs of the practical tasks. We also use the IT Journal for the students to update their teacher on their progress through each section. If no progress is shown in either location first contact is to be made through email to student and HoY.
