New Learning	What you will be learning about this week	The contrasting trends in economic development and environmental management between global regions since 1970 indicate differential progress that can be related to the outcomes of globalisation. To describe and explain China's income and environmental inequalities.	The social, political and environmental tensions that have resulted from the rapidity of global change caused by globalisation. Open borders, deregulation and encouragement of foreign direct investment has created culturally mixed societies and thriving migrant diasporas in some locations, but tensions have resulted elsewhere.	The social, political and environmental tensions have resulted from the rapidity of global change caused by globalisation. Attempts have been made in some locations to control the spread of globalisation by censorship (China or North Korea), limiting immigration (UK or Japan) and trade protectionism.	
	How we will teach you the new knowledge or ideas	PowerPoints will be uploaded to SHMW or you can make notes from the text book pages 182-183.	PowerPoints will be uploaded to SHMW or you can make notes from the text book pages 184-185.	PowerPoints will be uploaded to SHMW or you can make notes from the text book pages 186-187.
