Curriculum Plan		Subject		Computer systems/Networks		Year	10

	W/C 22th February	W/C 1st March	W/C 8th March	W/C 15th March	W/C 22nd March	W/C 29th March
How you will access home learning	Look at Satchel One for the lessons. All presentations and worksheets will be made available through both Satchel One and MS TEAMS using the team created for that IT group. Please look under the section entitled Files > Class materials. Students will be directed to complete a worksheet with practical tasks from the Oak Academy online.					
How you be able to interact with your teacher and gain feedback on your work	Satchel One and MS TEAMS will provide a medium for the distribution of materials and there may be further questions in the chat on the general channel but email should be used as the means of contacting the teacher directly for feedback and questions.					
Retrieval Focus How we will help you to recall previously learnt knowledge	The unit will be a new one but may consolidate knowledge, skills and understanding from KS3. Low stake quizzes will be used in the TEAMS assignments section at the end of each lesson and links will be shared through both Satchel One and MS Teams.					
New Learning	**What you will be learning about this week**	We are using the materials on Oak Academy to support the research of new topics with the GCSE specification. Students will finish the unit on computer systems and then move onto a unit based on networks and covering the internet, protocols, encryption and client/server – Peer to peer networking architecture.				
	How we will teach you the new knowledge or ideas	Students will be taught through; • Satchel One and MS TEAMS. • Introductory quizzes • Video modelling tasks • Worksheets • Practical tasks • Low stakes knowledge exit assignment quizzes				
	Activities that will help you learn and practice what you've been taught	Pupils will put evidence of their work into a PowerPoint based worksheet and submit this through Satchel One for assessment. They will also answer questions what they have learnt each lesson on an exit assignment quiz in MS TEAMS in order to demonstrate understanding. Regular teacher assessment, including questioning and observation, will be used in lessons in order to reinforce the evidence of understanding in the Assessment Portfolio.				
	What you can do if you're stuck	Firstly if a student is stuck on something in one of the lessons on the unit they should review the content as the directions to answers are always provided. If students are still struggling then students can contact the teacher through email, or MS TEAMS.				

Checking in How we will check in with you to support you with your remote learning	Satchel One and MS TEAMS allows teachers to see progress on the worksheets and screen grabs of the practical tasks. We also use the submission feature of Satchel One for students to submit worksheets and update their teacher on their progress through each section. If no progress is shown in either location first contact is to be made through email to student and HoY.
