

Curriculum Plan		Subject	Geography: Tectonic Hazards and Development		Year	7
Spring 1		W/C 10th January		W/C 17th January		W/C 24th January
How you will access home learning		All work will be set in your Microsoft Teams Group for Geography (look for group ending GG). If you are working from home, you should check your Teams group on the day that you have Geography on your timetable. There are also links to video lessons from the Oak Academy website each week that are listed below. These are for you to watch if there isn't any work set for you on Teams. This may happen if your teacher is absent.				
How you be able to interact with your teacher.		You can interact with your teacher by asking any questions about the work by using the chat function on your Year 7 Microsoft Team Class.				
Retrieval How we will help you to recall previously learnt knowledge		Introductory quizzes and questioning, recall practice and recaps of knowledge	Introductory quizzes and questioning, recall practice and recaps of knowledge	Introductory quizzes and questioning, recall practice and recaps of knowledge		
New Learning	What you will be learning about this week	What is hazard risk? What is a tectonic hazard? What is the structure of the earth and how does this link to the pattern of tectonic hazards?	Where do tectonic hazards occur and why? What are the different plate boundaries?	What are the causes, impacts and responses to an earthquake?		
	How we will teach you the new knowledge or ideas	PowerPoint presentation with instructions on each slide guiding you through some tasks to learn and practice new skills and content. Or you can watch these video lessons from the Oak Academy website: What is the structure of the Earth? (thenational.academy) How do the Earth's plates move? (thenational.academy)	PowerPoint presentation with instructions on each slide guiding you through some tasks to learn and practice new skills and content. Or you can watch these video lessons from the Oak Academy website: What are the different plate boundaries? (thenational.academy) What evidence is there that the Earth's crust moves? (thenational.academy)	PowerPoint presentation with instructions on each slide guiding you through some tasks to learn and practice new skills and content. Or you can watch these video lessons from the Oak Academy website: How can we measure and predict earthquakes? (thenational.academy) How can we prepare and protect against the impact of earthquakes? (thenational.academy)		
	Activities that will help you learn and practice what you've been taught	Activities will be built into the PowerPoint for you to complete as you follow the instructions and slides. These will be broken down into short tasks.				
	What you can do if you are stuck	You can ask a question through the chat function on your Year 7 Geography Microsoft Team.				

		W/C 31st January	W/C 7 th February
How you will access home learning		All work will be set in your Microsoft Teams Group for Geography (look for group ending GG) There are also links to video lessons from the Oak Academy website each week that are listed below. These are for you to watch if there isn't any work set for you on Teams. This may happen if your teacher is absent.	
How you be able to interact with your teacher and gain feedback on your work		You can interact with your teacher by asking any questions about the work by using the chat function on your Year 7 Microsoft Team Class.	
Retrieval How we will help you to recall previously learnt knowledge		Introductory quizzes and questioning, recall practice and recaps of knowledge.	Introductory quizzes and questioning, recall practice and recaps of knowledge
New Learning	What you will be learning about this week	What is development and how do we measure it? How might the level of development affect the impact of a tectonic hazard?	A closer look at a case study of an earthquake, by studying the Haiti earthquake in 2010. Why was this earthquake so destructive?
	How we will teach you the new knowledge or ideas	PowerPoint presentation with instructions on each slide guiding you through some tasks to learn and practice new skills and content. Or you can watch these video lessons from the Oak Academy website: What is development? (thenational.academy) How do we measure development? (thenational.academy)	PowerPoint presentation with instructions on each slide guiding you through some tasks to learn and practice new skills and content. Or you can watch these video lessons from the Oak Academy website: Where is Haiti and what is it like? (thenational.academy) What happened in the 2010 Haiti earthquake? (thenational.academy)
	Activities that will help you learn and practice what you've been taught	Activities will be built into the PowerPoint for you to complete as you follow the instructions and slides. These will be broken down into short tasks.	
	What you can do if you are stuck	You can ask a question through the chat function on your Year 7 Geography Microsoft Team.
